Island Project

You are going to pull all of your geography skills together to create your own island.

Your island needs to include the following items:

- A Theme
- A Title – appropriate in size
- A Map Key – with at 5 or more symbols
- Lines of Longitude – drawn on and labeled in pencil – counted by 1 or 2 degrees
- Lines of Latitude – drawn on and labeled in pencil– counted by 1 or 2 degrees
- A Compass Rose
- 5 or more Landform
- 3 or more Bodies of Water
- Colorful – Neat – Legible

You can refer to Ms. Yentes's example island for ideas, but do not copy it completely. Remember that the theme is your choice but it should be something you know about. Examples of themes you can use are a favorite holiday, favorite video game, you, favorite food, or any other theme of your choice.

You need to sketch a rough draft on a piece of white paper. Use the list above to make sure you have everything on the list you need to get the best grade possible.
Once your draft is done, show it to your teacher. If your draft is approved, then you need to get some construction paper and create your final project.

Have fun and be creative.
